Colour Vision Deficiencies VI

Proceedings of the Sixth Symposium of the
International Research Group on Colour Vision
Deficiencies held at the Klinikum der Freien
Universität, (West) Berlin-Steglitz,
17–19 September 1981

Edited by G. Verriest

Dr W. Junk Publishers The Hague – Boston – London 1982

CONTENTS

1. SPATIAL AND TEMPORAL APPROACHES FOR STUDYING COLOUR VISION

Spatial and temporal approaches for studying color vision. A review. (Invited paper) by R.M. Boynton	1
The effect of stimulus size on chromatic thresholds in the peripheral retina by M.A. Johnson and R.W. Massof	15
Tritanopic saturation and borderline distinctivity by W. Thoma and H. Scheibner	19
Magnitude estimation of lightness spatial variations by M.L.F. de Mattiello and A. Biondini	29
Comparison of rhesus and human dynamic spectral acuity by H. Zwick, K.R. Bloom and D.O. Robbins	35
A new effect associated with central color vision deficiency: Spreading inhibition by I.E. Holliday, I.M. Hendricks and K.H. Ruddock	41
Discrimination of grays under different contrast relations by M.L.F. de Mattiello and V. Buscaglia	47
Dynamic changes in sensitivity to long-wavelength incremental flashes by L.T. Sharpe and J.D. Mollon	53
Spectral sensitivity measured by motion photometry by J.D. Moreland	61
Responses to short duration red-green mixtures by L.R. Ronchi and R. Macii	67
Dichoptic flicker photometry by C.R. Cavonius and A.J. Reeves	73
Asthenopia in normal and red-green color deficient observers by J.D. Cohen and H.B. Greenbaum	79

2. WHY IS THE BLUE MECHANISM MORE LIABLE TO ACQUIRED DAMAGE?

A taxonomy of tritanopias by J.D. Mollon	87
Electrophysiological characteristics of the blue sensitive mechanism: Test of a model of cone interaction under physiological and pathological conditions by E. Zrenner	103

Spectral sensitivity of cone mechanisms in juvenile diabetics by F. Zisman and A.J. Adams	127
The blue mechanism in diseased eyes with eccentric fixation by M. Marré and E. Marré	133
Partial cerebral achromatopsia with selective hue loss by B.R. Wooten	139
What is odd about the short-wavelength mechanism and why is it disproportionately vulnerable to acquired damage? Report of a discussion by J.D. Mollon	145

3. METHODS OF EXAMINATION

Diagnosis of acquired colour vision defects with the help of decision theory by A. Serra, C. Mascia, C. Dessy and R. Casti	151
Pass/fail criteria in colour vision tests and their effect on decision confidence by A.R. Hill and P.A. Aspinall	157
Decision analysis for colour vision testing by P.A. Aspinall and A.R. Hill	163
Minimal requirements for colour vision examination by A. Pinckers	169
Colour vision tests in children by G. Verriest, A. Uvijls, M.-F. Gandibleux, P. Pierart, A. Malfroidt and M.-R. de Coninck	175
An investigation into the reliability of testing small children in a screening colour vision test by S.R. Cobb	179
An evaluation of some colour vision tests for children by A.R. Hill, G. Heron, M. Lloyd and P. Lowther	183
Childrens' tests — Further applications by R. Fletcher	189
The SPP test — A quantitative analysis by R. Lakowski, K. Young and J. Kozak	191
A new assessment of the normal ranges of the 100 hue to total scores by G. Verriest, J. van Laethem and A. Uvijls	199
An evaluation of new and used FM 100 hue discs by A.R. Hill and K. Wade	209
Contrast discrimination test: Clinical application in acquired diseases by A. Gonella and M.L.F. de Mattiello	215
First experiences with Richter's 'Spectrotest' by F. Haeger and M. Richter	225

Diagnosis of defective colour vision using the Nagel anomaloscope by J. Birch	231
Tritanomaloscope findings in typical and atypical achromatopsia by W. Jaeger and H. Krastel	237
The importance of the blue-green matches in clinical diagnosis by A. Roth	241
Experimental tritanomaloscope for detecting tritan defects and its application in fundus diseases by Y. Ohta, Y. Izutsu, T. Motohashi, E. Tanabe and K. Shimizu	247
Control in measurement of chromatic dark adaptation by R. Lakowski and A. Carsh	257
Fourier interferometric stimulations (FIS). A new method for the study of spectral characteristics in visual systems by R. Gemperlein	265

4. CONGENITAL DEFECTS

Colour vision variations in monkeys. Behavioural and microspectrophotometric measurements of the same individuals by G.H. Jacobs, J.K. Bowmaker and J.D. Mollon	269
Dichromatic colour confusions and the spectral sensitivity of the retinal receptors by W.D. Wright	281
Intensity invariance of the achromatic point in sex-linked dichromacy by K. Knoblauch and B.R. Wooten	287
Discrimination mechanisms in color deficient systems by D. Jameson, L.M. Hurvich and D. Varner	295
Analysis of the chromatic Stiles-Crawford effect of colour vision deficient observers by E.C. de Vries-de Mol and P.L. Walraven	303
Postreceptoral colour vision mechanisms in congenial red-green anomalous trichromacy by I.M. Hendricks and K.H. Ruddock	311
Perceived brightness by normals and defectives by W.A. Thornton	315
On the relationship between protanomaly and protanopia by E. Wolf and H. Scheibner	321
Denomination of greys in total achromatopsia by P. Lanthony	327
Large field spectral sensitivity in congenital and acquired achromatopsia by H. Krastel and W. Jaeger	329
Tetartanomaly in a mixed heterozygote by A.R. Hill and P.A. Aspinall	333

Statistical demonstration of minor colour vision abnormalities by G. Verriest, F. Haurez and P. Pierart	337
Reconsidered classification of congenital colour vision defects by I. Iinuma	339
Colorimetric evaluation of urine-sugar tests used by diabetic patients by V.C. Smith, S.A. Burns and J. Pokorny	345
Experiences with assisting daltonics by R. Fletcher	355

5. ACQUIRED DEFECTS

A. By ocular lesions

Peripheral thresholds and chromatic discrimination in ophthalmologic diagnosis by E. Hansen	357
Eccentrisation and scotoposition in acquired color vision defects by M. Marré and E. Marré	373
Electro-ophthalmological findings and spectral sensitivity functions in acquired colour vision deficiencies by C.J. Krüger and M. Baier	379
On spectral sensitivity of the retinal receptors in central serous chorioretinopathy by Y. Ohta, T. Myamoto, A. Seki and Y. Kajigaya	389
X-linked progressive cone dystrophy by A. Pinckers	399
Advantages of the two colour threshold method in diabetics and its comparison with an arrangement test by J. Vola, J. Leid, V. Leid, P. Gastaud and J.B. Saracco	405
Chromaticity and luminosity changes in glaucoma and diabetes by A.J. Adams, F. Zisman, R. Rodic and J.C. Cavender	413
Use of desaturated and saturated versions of the D-15 test in glaucoma and glaucoma-suspect patients by A.J. Adams and R. Rodic	419
A modified 100 hue test for use in the investigation of glaucoma by C.P. Connolly, F. Metzstein and G. Heron	425

B. By lesions of the optic pathways and by intoxications

Colour vision in brain lesions by A. Dubois-Poulsen	429
Luminance and colour dysfunction in retrobulbar neuritis by S. Alvarez, P.E. King-Smith and S.K. Bhargava	441

VIII

Some temporal aspects of colour discrimination in multiple sclerosis by A. Serra	445
Pattern of visual recovery after relief of chiasmal compression by I.A. Chisholm and J.A. Kearns	453
Human vision without luminance-contrast system; selective recovery of the red-green colour-contrast system from acquired blindness by J. Rovamo, L. Hyvärinen and R. Hari	457
Drug-induced color vision deficiencies – From side effects to clinical pharmacology by R.G. Alken	467
Color vision deficiencies induced by digoxin in healthy volunteers by R.G. Alken and T. Schnabel	477
Tricyclic psychopharmaca and colour vision by O. Lagerlöf	487
Rapid effects on colour vision, following intravenous injection of a new, non-glycoside positive inotropic substance (AR-L 115 BS) by E. Zrenner, W. Kramer, Ch. Bittner and M. Schlepper	493
Differences in color vision deficiencies induced by various cardiac glycosides by R.G. Alken, H. Hipp and H. Alter	509

6. CORRECTIONS TO PAPERS FROM PRECEEDING SYMPOSIA

Correction to the paper ‘Genetics of colour vision’ by L.N. Went and E.C. de Vries-de Mol by L.N. Went	519
Correction to the paper ‘Two cases of inherited deutan and tritan disturbances in the same person, and a study of their families’ by S. van Merendonk and L.N. Went by L.N. Went	520
