

Colour Vision Deficiencies VIII

Proceedings of the eighth symposium of the
International Research Group on Colour Vision
Deficiencies held at the Palais des Papes, Avignon,
France, 23–26 June 1985

Edited by G. Verriest

International Research Group on Colour Vision
Deficiencies. Symposium (8th : 1985 : Avignon,
France)

Colour vision deficiencies VIII : proceedings of
the Eighth Symposium of the International Research
Group on Colour Vision Deficiencies, held at the
Palais des Papes, Avignon, France, 23-26 June 1985.

(Documenta ophthalmologica. Proceedings series ;
46)

1. Color blindness--Congresses. 2. Color vision--
Congresses. I. Verriest, Guy. II. International
Research Group on Colour Vision Deficiencies. III. Title.

IV. Title: Colour vision deficiencies 8. VI. Title:
Color vision deficiencies VIII. VI. Series: Documenta
ophthalmologica. Proceedings series; v. 46.

CONTENTS

1. OBITUARIES

Dr W.S. Stiles (1901–1985) by J.D. Mollon	1
Yves Le Grand (1908–1986) by C. Darras, C. Bourdy and G. Verriest	3

2. VISUAL EFFECTS OF INTENSE LIGHTS

Intense spectral light induced color blindness in Rhesus monkeys (invited paper) by H.G. Sperling and A.A. Wright	5
A case of blue-yellow defect induced by intense blue light by K. Kitahara, R. Tamaki, H. Hibino and T. Oyama	21
Colour vision changes following different types and amounts of argon laser photocoagulation in the treatment of diabetic reti- nopathy by J. Birch	31

3. EFFECTS OF INTOXICATIONS ON COLOUR VISION

Colour vision deficiencies caused by pharmacotherapy (invited paper) by W. Jaeger and H. Krastel	37
Cone interactions in drug-induced retinal dysfunctions by E. Zrenner and J. Nowicki	53
Colour vision in patients suspected of intoxication by A. Pinckers	55
Color vision test with 'Standard Pseudoisochromatic Plates Part 2' for Ethambutol-induced optic neuropathy by S. Tanabe, K. Makita and H. Koketsu	59
On the assessment of visual impairment in drug-addicts: Colour	

discrimination versus eye muscular performance by A. Serra, C. Dessy, A. Molari, M. Siotto-Pintor, I. Zucca and A. Mulas	67
Retinal canthaxanthin thesaurismosis; Functional evaluations by P. Metge	75
ERG and chlorpromazine-induced ocular intoxications by G. Mack, F. Fritsch and G. Rudolf	79

4. AGEING AND VISION

Colour vision and age (invited paper) by R.A. Weale	85
Comparisons across age of selected visual functions by A. Eisner	99
The effect of age on color discrimination: A field study on the road at night by R. Paoletti Perini and G. Passigli	111
Decline of contrast perception and colour sensitivity with age by H. Kalmus	117

5. METHODS OF EXAMINATION

Viewing time – A neglected parameter in colour vision assessment? by S.P. Taylor	121
An evaluation of the standard pseudoisochromatic plates (SPP 1) in clinical use by M. Mäntyjärvi	125
Detection of acquired color vision defects by Standard Pseudo isochromatic Plates Part 2 by K. Ichikawa, H. Ichikawa and Sh. Tanabe	133
A. Tritan Album by P. Lanthony	141
Screening functional color vision anomalies: A comparison of the City University and AO-HRR tests on children by F. Zisman and A.J. Adams	145
A new method for presenting the results of the 28-Hue test by means of numerical scores by T. Steinschneider	151
An analysis of the results of the Farnsworth-Munsell 100-Hue Test in acquired blue-yellow defects by K. Kitahara, A. Kandatsu and M. Nishimuta	157
Results of a shortened Lightness Discrimination Test by A. Pinckers and G. Verriest	163
Some observations on colour vision of young children during screening examinations by T. Steinschneider	167

Specificity evaluation of the OSCAR color vision test by F. Zisman, K.R. Seger and A.J. Adams	173
About the OSCAR Test by G. Verriest and A. Uvijls	177
A new computer graphics test for red/green colour anomaly by P.F. Heard, C.J. Stone, R.L. Gregory and V.J. Marmion	181
Experimental trials on a modified Engelking equation by J.D. Moreland, H. Krastel, W. Jaeger, M. Pelizzone and A. Roth	195
The diagnosis of acquired colour vision deficiencies by means of metameric matches (using the Besançon anomalometer) by A. Roth, D. Hermès and M. Pelizzone	203
Photometric data of the Besançon anomalometer by M. Pelizzone, R. Muri and A. Roth	217
Further development of the LED – ‘pocket’ – anomaloscope by H. Krastel, F. Bolle, H. Gehrung, R. Kirchhübel and H. Schlemmer	223
Tritan screening with a modified TNO test by J. Birch, K. Tertuik and F. North	227
Validation trials on an optimum blue-green equation by J.D. Moreland and A. Roth	233
A simple clinical test of blue cone sensitivity in early eye disease by A.J. Adams, K.E. Huie, B.E. Scheffrin, G.H. Bresnick and F. Zisman	237
Critical flicker frequencies with red, green and yellow lights in congenital and acquired colour vision deficiencies by K. Hamano, T. Miyamoto, M. Nagai, K. Saiki and Y. Ohta	243
‘Le différenciateur de tonalité’: An apparatus for measuring wavelength discrimination by F. Viénot, F. Bouhard and M. Schoeffter	253
Improved clinical technique for Wald-Marré functions by M. Lutze, J. Pokorny and V.C. Smith	259
Color contrast perimetry: Hue discrimination defects in acquired dyschromatopsias by W.M. Hart Jr.	267
Automatic perimetric exploration of the differential threshold for different coloured lights by M. Gonzales de la Rosa, C. Mesa Moreno, J. Aguilar Estevez and M.A. Serrano Garcia	275
Human electroretinogram measures of retinal blue cone pathway sensitivity by A.J. Adams, F. Zisman, G. Jastrzebski, W. Kajumura, Kr	287
Requirements for lantern tests by R. Fletcher	295
Introduction of Chinese designed colour vision testing charts and instrument by T.H. Dong, L.C. Xie and W.Y. Jin	299

6. CONGENITAL DEFECTS

Application of a model to the evaluation of color vision tests and to the design of instruments visualizing the color perception of dichromats by A. Vincke	303
Protanomalous opponent colour vision by E. Wolf and H. Scheibner	313
Mesopic dueteranopic vision: Two-dimensional versus three-dimensional by P. Scheufens and H. Scheiber	319
A new analysis of spectral sensitivity curves from Hsia and Graham by C. Magis	327
A case report of deuteranopia with ocular albinism: A variant of Forsius-Eriksson syndrome by A. Majima	333
Colour asthenopia and colour amblyopia by M. Marré, E. Marré and R. Müller	339
Hereditary colour vision defects in Mali (scholar survey with the Ishihara text) by A.D. Negrel and P. Vingtain	345

7. ACQUIRED DEFECTS

Colour vision in aphakia and pseudophakia by M. Marré, E. Marré and D. Fülle	349
Central colour vision in aphakia and pseudophakia by A. Hanabusa, T. Miyamoto, S. Noyori, M. Naruto, K. Shimizu and Y. Ohta	357
Colour vision in pseudophakic eyes by C. Cunin-Malejac, J. Royer and A. Roth	363
Colour vision in aphakic and pseudophakic patients by J.L. Vola, S. Martin and A. Lamoureux	371
Rayleigh color matches in central serous chorioretinopathy with congenital color vision defects by K. Atsushi, H. Kitahara and K. Kitahara	373
Color vision deficit in diabetic retinopathy: Application of Kitahara scoring technique by G.H. Bresnick, T. Benzschawel and M. Palta	377
Diabetic dyschromatopsia: Pathogenic hypothesis by P. Gastaud, J. Vola, J.B. Saracco, B. de Galleani and C. Costet	387
Colour vision studies in families with dominant optic atrophy by H.C.J. Roggeveen, A.P.C.M. de Winter and L.N. Went	391
Pathophysiological considerations in dominant optic atrophy	

based upon spectral sensitivity, tritanomaloscopy, blue perimetry and visual electrophysiology by W. Jaeger, Th. Berninger and H. Krastel	397
Sources of short-wavelength sensitivity loss in glaucoma by B. Drum	413
Contrast sensitivity in glaucoma: its relation to the loss of luminosity by A. Gonella and M.L.F. de Mattiello	423
Colour evoked potentials in demyelinating disease by W.M. Paulus, S. Krafczyk and Th. Brandt	429

8. PRACTICAL ASPECTS

Evidence for an effect by colour defect on school achievement by S.R. Cobb	433
The influence of diabetic dyschromatopsia on the interpretation of self-monitoring coloured reagent strips by J. Leid, V. Leid and P. Massabie	439
Influence of color vision deficiencies on home blood glucose monitoring by F. Zisman and A.J. Adams	445
Study of visual performance on a multi-color VDU of color-defective and normal trichromatic subjects by G. Verriest, I. Andrew and A. Uvijls	453
Ergonomically optimal colours for colour-defective CRT operators by W. de Corte	459
The X-Chrom lens – does it have any effect on colour perception of colour-deficient observers? by S.P. Taylor	467

9. PHYSIOLOGICAL BASES

The chromatic antagonisms of opponent process theory are not the same as those revealed in studies of detection and discrimination by J.D. Mollon and C.R. Cavonius	473
Nonlinearity of yellow-blue opponent-color system: Discrepancy between deuteranope and normal trichromat by M. Akita, S. Takahashi and Y. Ejima	485
Are colours a real vectorial space? by C. Magis	493
Characteristic of contrast vision by M.L.F. de Mattiello, A. Gonella and E. Mazzeo	497
The evolution of trichromatic vision in the primates by H. Kalmus	505

Variation of spatial summation for color targets in normal photopic vision by F.E. Sucs	511
Protecting effects of <i>Ginkgo biloba</i> extract on the retinal function by M. Doly, P. Braquet, K. Drieu, B. Bonhomme and M.T. Droy	515
