# CONTENTS

Obituary: Guy Verriest	XI
<b>1. POLYMORPHISMS OF NORMAL COLOUR VISION AND INHERITED COLOUR DEFECTS</b>	
T. Piantanida (Invited Paper): Menlo Park, CA, U.S.A. Molecular genetics of human color vision.	1
J. Neitz and G. H. Jacobs: Santa Barbara, CA, U.S.A. Polymorphisms of cone pigments among color normals: evidence from color matching.	27
S. De Bie, J. Wilmet, G. Verriest and P. Pierart: Ghent, Belgium. Minor colour vision defects: sib-sib correlations and relation to unique colours.	35
A. L. Nagy: Dayton, OH, U.S.A. Color discrimination and post-receptoral processes in congenital color deficient.	47
A. E. Elsner, J. Waldvogel and S. A. Burns: Pittsburgh, PA, U.S.A. High illuminance color matching in anomalous trichromacy.	57
M. Lutze, V. C. Smith, and J. Pokorny: Chicago, IL, U.S.A. Critical flicker frequency in X-chromosome linked dichromats.	69
J. M. Steward and B. L. Cole: Vermont, Victoria, Australia. The effect of object size on the performance of colour ordering and discrimination tasks.	79
P. Gouras, C. J. MacKay and A. L. Lewis: New York, NY, U.S.A. The blue cone electroretinogram isolated in a sex-linked achromat.	89
R. Klingaman: Memphis, TN, U.S.A. VEP measures in a blue cone monochromat.	95
J. Birch: London, U.K. Congenital protan and deutan defects in women.	101
S. R. Cobb: Glasgow, U.K. On a possible explanation of the unusually high rates of colour vision defects in some West of Scotland primary schools.	107

J. M. Steward and B. L. Cole: Melbourne, Australia. Incidence of congenital colour vision defects in an Australian optometric population.	109
M. Marré, C. Lange, R. Roitzsch, H.-J. Buchmann and R. Sender: Dresden, G.D.R. Color vision screening in 4384 kindergarten children.	113

## 2. THEORETICAL STUDIES OF COLOUR VISION

G. A. Fry: Columbus, OH, U.S.A. König models of color vision.	117
H. Scheibner and R. Bruckwilder: Düsseldorf, F.R.G. Protanopic opponent colour vision.	125

## 3. CORTICAL MECHANISMS OF NORMAL AND ABNORMAL COLOUR VISION

P. E. King-Smith (Invited Paper): Columbus, OH, U.S.A. Cortical colour defects.	131
J. J. Kulikowski, I. J. Murray and N. R. A. Parry: Manchester, U.K. Electrophysiological correlates of chromatic-opponent and achromatic stimulation in man.	145
H. Plendl and W. Paulus: Munich, German Federal Republic F.R.G. Interaction between colour- and pattern-evoked potentials.	155
K. A. Manning and K. Knoblauch: Stony Brook, NY, U.S.A. Color differences in a deuteranope scaled by chromatic modu- lation sensitivity.	161

## 4. ACQUIRED COLOUR VISION DEFICIENCIES IN RETINAL DISORDERS

S. A. Burns and A. E. Elsner (Invited Paper): Pittsburgh, PA, U.S.A. Localizing color vision deficiencies in eye disease.	167
M. Marré, E. Marré, H.-J. Zenker and D. Fülle: G.D.R. Color vision in a family with autosomal dominant cone dystrophy.	181
F. Zisman and M. G. Harris: Berkeley, CA, U.S.A. Filter enhanced visual acuity in a case of central cone-rod dystrophy.	189

G. H. Bresnick, V. Smith and J. Pokorny: Madison, WI, and Chicago, IL, U.S.A. A familial macular dystrophy with apparently preferential short-wavelength-sensitive cone involvement. Preliminary report.	195
M. J. Jaffe, R. S. Sherins and F. M. de Monasterio: Washington DC and Bethesda, MD, U.S.A. Color vision losses in Kallmann syndrome.	201
F. M. de Monasterio and R. B. Nussenblatt: Bethesda, MD, U.S.A. Early color vision and ERG alterations in posterior uveitis.	209
A. J. Vingrys, P. E. King-Smith and S. C. Benes: Columbus, OH, U.S.A. Equiluminous color deficits are greater than achromatic losses in cases of toxoplasmosis.	217
A. Serra, M. Fossarello, G. De Martini, M. D'Atri, I. Zucca and M. G. Mulas: Cagliari, Italy. Color discrimination in long-term idiopathic central serous choroidopathy.	229
V. C. Greenstein, D. C. Hood and R. E. Carr: New York, NY, U.S.A. A comparison of S cone pathway sensitivity loss in patients with diabetes and retinitis pigmentosa.	233
K. E. Higgins, K. Knoblauch, M. S. Roy, E. Thall, R. Gunkel and F. M. de Monasterio: Bethesda, MD and New York, NY, U.S.A. Saturation discrimination and the degree of diabetic retinopathy.	243
H. Zwick, K. R. Bloom and E. S. Beatrice: San Francisco, CA, U.S.A. Permanent visual change associated with punctate foveal lesions.	251

## 5. ACQUIRED COLOUR DEFECTS IN OPTIC NERVE DISORDERS

B. Drum, M. F. Armaly and W. E. Huppert: Baltimore, MD, U.S.A. Chromatic and achromatic sensitivity in glaucoma.	261
F. Sucs and G. Verriest: Brussels/Ghent, Belgium. Increment thresholds and spatial summation for colour targets in ocular hypertension and glaucoma.	273
T. Steinschneider and U. Ticho: Jerusalem, Israel. Thresholds for blue and white stimuli in glaucoma.	281

R. Lakowski, J. G. Airaksinen, S. M. Drance and Y. Yamazaki: Vancouver, British Columbia, Canada. Chromatic functional loss and its relation to the morphology of the retina in the glaucomatous eye.	289
P. E. King-Smith, A. J. Vingrys, S. C. Benes and W. H. Havener: Columbus, OH, U.S.A. Differences between perimetric thresholds for white and equi- luminous red, blue and yellow in a nerve fiber bundle defect.	301
S. Alvarez and P. E. King-Smith: Birmingham, AL, and Colum- bus, OH, U.S.A. Mysterious sparing of blue sensitivity on yellow backgrounds in dominant optic atrophy.	309
A. Roth, M. Pelizzone and D. Hermès: Geneva, Switzerland. The two equation method. I. Results in normal color vision.	317
D. Hermès, A. Roth and N. Borot: Geneva, Switzerland. The two equation method. II. Results in retinal and optic nerve disorders.	325

## 6. ACQUIRED COLOUR DEFECTS IN SHORT- WAVELENGTH CONE PATHWAYS

M. Fossarello, C. M. Dessy, I. Zucca, L. Orrù. S. Uccheddu and A. Serra: Cagliari, Italy. Colour discrimination in long-term aphakia.	339
G. Haegerstrom-Portnoy, S. E. Hewlett and S. A. N. Barr: Berkeley, CA, U.S.A. S cone loss with aging.	345
M. Kalloniatis and R. S. Harwerth: Houston, TX, U.S.A. Differential adaptation of cone mechanisms explains the pref- erential loss of short-wavelength cone sensitivity in retinal disease.	353
H. G. Sperling and S. L. Mills: Houston, TX, U.S.A. ERG and behavioral analysis of spectral sensitivity in normal and blue-blind rhesus monkeys.	365

## 7. FARNSWORTH-MUNSELL 100-HUE TEST AND OTHER CLINICAL COLOUR VISION TESTS

R. Lakowski (Invited Paper): Vancouver, British Columbia, Canada. Uses and abuses of the Farnsworth-Munsell 100-hue test.	375
J. D. Moreland: Bradford, U.K. Unipolar, bipolar and other errors in the Farnsworth-Munsell 100-hue test.	397
T. Steinschneider: Jerusalem, Israel. Method for estimating results in Farnsworth's D15 tests.	407

K. Knoblauch, F. Saunders, M. Kusuda, R. Hynes, K. E. Higgins and F. M. de Monasterio: New York, NY, and Bethesda, MD, U.S.A. Quantitative comparison of Farnsworth and Kinnear plots of the Farnsworth-Munsell 100-hue test.	413
B. C. Reeves, A. R. Hill and P. A. Aspinall: Oxford, Edinburgh, U.K. Normative data for the significance of a change in error score on the Farnsworth-Munsell 100-hue test.	417
S. J. Dain and V. J. Honson: New South Wales, Australia. Selection of an optimal light source for the FM 100-hue test.	425
J. Birch: London, U.K. Farnsworth tests in the study of acquired colour vision defects in diabetic retinopathy	433
R. L. Klingaman and M. Baier: Memphis, TN, U.S.A. and Bad Nauheim, F.R.G. Loss of color opponency and concomitant changes in FM-100 hue test in a case of cone-rod dystrophy.	441
A. R. Hill, B. C. Reeves and A. E. Burgess: Oxford, U.K. A quick and simple portable scorer for the FM 100-hue test.	447
K. Kitahara, A. Kandatsu, M. Nishimuta and R. Tamaki: Tokyo, Japan. Theoretical patterns of Farnsworth-Munsell 100-hue test in congenital color vision defects.	455
J. D. Moreland: Bradford, U.K. Characteristics of the random 100-hue observer.	463
R. Lakowski, M. Yamazaki and J. Kozak: Vancouver, Canada. Objective data for the SPP test, Part 2 (For acquired color vision defects).	469
G. Verriest and A. Uvijls: Ghent, Belgium. Results of the OSCAR test in groups of normal and abnormal subjects.	479
M. Mäntyjärvi: Kupio, Finland. Observations on the use of the Lanthony Tritan Album.	487
J. Leid and V. Leid: Pau, France. Clinical study of the Lanthony's Tritan Album: Initial results.	495

## 8. NEW INSTRUMENTS AND TECHNIQUES FOR TESTING COLOUR VISION

K. Hamano, Y. Ohta, S. Noyori, H. Shiraishi and K. Shimizu: Tokyo, Japan. Experimental small anomaloscope utilizing light-emitting diodes.	503
J. Pokorny, V. C. Smith and M. Lutze: Chicago, IL, U.S.A. A computer-controlled briefcase anomaloscope.	515

M. Pelizzone, A. Roth and D. Hermès: Geneva, Switzerland. First trials on an automated examination of color vision.	523
M. E. Breton, P. J. Ryan, R. J. Fonash and S. Cranstoun: Philadelphia, PA, U.S.A. Evaluation of a CRT-based test of saturation discrimination using a discrete matching technique	529
R. W. Massof and M. L. Severns: Baltimore, MD, U.S.A. The anomaloscope plate test: a new color vision test for screening congenital red-green defects.	539
T. Motohashi, Y. Ohta, A. Hanabusa and H. Shiraishi: Tokyo, Japan. Comparative study between test results of 8 deg. large-field anomaloscope and large-size panel D15 test on dichro- mats.	543
W. M. Hart, Jr.: St. Louis, MO, U.S.A. Color contrast perimetry testing of the extrafoveal macula.	555
S. J. Dain and P. E. King-Smith: New South Wales, Australia, Columbus, OH, U.S.A. Thresholds for iso-luminous colors across the visual field.	561
J. F. Kozak and R. Lakowski: Vancouver, Canada. An evaluation of the Fieldmaster F225 automatic perimeter.	573
A. Serra, I. Zucca, C. M. Dessy, A. Falchi, P. C. Lai and A. Mulas: Cagliari, Italy. Acquired color vision deficiencies and electronics.	583
R. D. Gunkel, R. C. Caruso and M. S. Roy: Bethesda, MD, U.S.A. Saturation and luminosity in color vision testing.	589
M. L. F. de Mattiello and A. Gonella: Buenos Aires, Argentina. The function of chromatic lightness and its application in ocular pathology.	595
M. L. F. de Mattiello and A. Gonella: Buenos Aires, Argentina. Change in the inhibiting effects of ocular pathology.	607
H. Zwick, M. Belkin and T. A. Garcia: San Francisco, CA, U.S.A. Effects of broadbanded eye protection on dark adapta- tion.	615
