Oxford University Press is a department of the University of Oxford.
It furthers the University's objective of excellence in research, scholarship,
and education by publishing worldwide in

Oxford New York

Auckland Bangkok Buenos Aires Cape Town Chennai
Dar es Salaam Delhi Hong Kong Istanbul Karachi Kolkata
Kuala Lumpur Madrid Melbourne Mexico City Mumbai Nairobi
São Paulo Shanghai Taipei Tokyo Toronto

Oxford is a registered trade mark of Oxford University Press
in the UK and in certain other countries

Published in the United States
by Oxford University Press Inc., New York

CONTENTS

Introduction: Thomas Young and the trichromatic theory of colour vision
page xix

J. D. Mollon

Section 1 Photoreceptors and their evolution

- 1 Electrons and X-rays reveal the structure of rhodopsin: a prototypical G protein-coupled receptor—Implications for colour vision *page 3*
Jonathan J. Ruprecht and Gebhard F. X. Schertler
- 2 Photopigment polymorphism in prosimians and the origins of primate trichromacy *page 14*
Gerald H. Jacobs and Jess F. Deegan II
- 3 Did primate trichromacy evolve for frugivory or folivory? *page 21*
P. Sumner and J. D. Mollon
- 4 Lack of S-opsin expression in the brush-tailed porcupine (*Atherurus africanus*) and other mammals. Is the evolutionary persistence of S-cones a paradox? *page 31*
P. Ahnelt, K. Moutairou, M. Glösmann, and A. Kübber-Heiss
- 5 The arrangement of L and M cones in human and a primate retina *page 39*
J. K. Bowmaker, J. W. L. Parry, and J. D. Mollon
- 6 Comparison of human and monkey pigment gene promoters to evaluate DNA sequences proposed to govern L:M cone ratio *page 51*
C. McMahon, J. Neitz, and M. Neitz

Section 2 Retinal processes

- 7 Structure of receptive field centers of midget retinal ganglion cells *page 63*
Barry B. Lee
- 8 The neural circuit providing input to midget ganglion cells *page 71*
David W. Marshak
- 9 Coding of position of achromatic and chromatic edges by retinal ganglion cells *page 79*
Hao Sun, Barry B. Lee, and Lukas Rüttiger

Section 3 Spatial and temporal aspects of colour perception

- 10** Psychophysical correlates of parvo- and magnocellular function *page 91*
 Vivianne C. Smith and Joel Pokorny
- 11** Spatial contrast sensitivity for pulsed- and steady-pedestal stimuli *page 108*
 Anna Leonova, Joel Pokorny, and Vivianne C. Smith
- 12** Chromatic assimilation: evidence for a neural mechanism *page 114*
 Steven K. Shevell and Dingcai Cao
- 13** Reaction times to stimuli in isoluminant colour space *page 122*
 D. J. McKeeffry, N. R. A. Parry, and I. J. Murray
- 14** Integration times reveal mechanisms responding to isoluminant chromatic gratings: a two-centre visual evoked potential study *page 130*
 A. G. Robson, J. J. Kulikowski, M. Korostenskaja, M. M. Neveu, C. R. Hogg, and G. E. Holder
- 15** Temporal frequency and contrast adaptation *page 138*
 Arthur G. Shapiro, S. Mary Hood, and J. D. Mollon
- 16** Contribution of achromatic and chromatic contrast signals to Fechner–Benham subjective colours *page 145*
 J. Le Rohellec, H. Brettel, and F. Viénot
- 17** Sensitivity to movement of configurations of achromatic and chromatic points in amblyopic patients *page 154*
 M. L. F. de Mattiello, M. Maneiro, and S. Buglione
- 18** Convergence as a function of chromatic contrast: a possible contributor to depth perception? *page 160*
 Galina V. Paramei and Wolfgang Jaschinski

Section 4 Rods and colour vision

- 19** The influence of rods on color naming during dark adaptation *page 173*
 Janice L. Nerger, Vicki J. Volbrecht, and Kristin A. Haase
- 20** Stimulus duration affects rod influence on hue perception *page 179*
 Steven L. Buck and Roger Knight

Section 5 Natural scenes and colour constancy

- 21** The Verriest Lecture: Colour discrimination, colour constancy and natural scene statistics *page 189*
 Donald I. A. MacLeod
- 22** Tritanopic colour constancy under daylight changes? *page 218*
 David H. Foster, Kinjiro Amano, and Sérgio M. C. Nascimento

- 23 Red–green colour deficiency and colour constancy under orthogonal-daylight changes *page 225*
Kinjiro Amano, David H. Foster, and Sérgio M. C. Nascimento
- 24 Calculating appearances in complex and simple images *page 231*
John J. McCann
- 25 The effect of global contrast distribution on colour appearance *page 239*
K. Wolf and A. C. Hurlbert

Section 6 Colour spaces and their variation

- 26 Schopenhauer’s “parts of daylight” in the light of modern colorimetry *page 251*
Jan J. Koenderink
- 27 Representing an observer’s matches in an alien colour space *page 267*
Kenneth Knoblauch
- 28 Macular pigment: nature’s notch filter *page 273*
J. D. Moreland and S. Westland
- 29 How to find a tritan line *page 279*
H. E. Smithson, P. Sumner, and J. D. Mollon
- 30 Some properties of the physiological colour system *page 288*
C. von Campenhausen, and J. Schramme

Section 7 Inherited colour deficiency: molecular genetics

- 31 Genotypic variation in multi-gene dichromats *page 299*
S. S. Deeb, W. Jagla, H. Jägle, T. Hayashi, and L. T. Sharpe
- 32 Hybrid pigment genes, dichromacy, and anomalous trichromacy *page 307*
Wolfgang Jagla, Tanja Breitsprecher, Itala Kucsera, Gyula Kovacs, Bernd Wissinger, Samir S. Deeb, and Lindsay T. Sharpe
- 33 Middle wavelength sensitive photopigment gene expression is absent in deuteranomalous colour vision *page 318*
Maureen Neitz, Kathryn Bollinger, and Jay Neitz

Section 8 Inherited colour deficiency: psychophysics and tests

- 34 Preliminary norms for the Cambridge colour test *page 331*
D. F. Ventura, L. C. L. Silveira, A. R. Rodrigues, J. M. de Souza, M. Gualtieri, D. Bonci, and M. F. Costa
- 35 Evaluation of “Colour vision testing made easy” *page 340*
Stephen J. Dain

- 36 Survey of the colour vision demands in fire-fighting *page 347*
Stephen J. Dain and Laura E. Hughes
- 37 Lantern colour vision tests: one light or two? *page 354*
Jeffery K. Hovis
- 38 Extreme anomalous trichromatism *page 364*
Jennifer Birch
- 39 Colour naming, colour categories, and central colour-coding in a case of X-linked incomplete achromatopsia *page 370*
J. B. Nolan, M. A. Cognale, and M. A. Webster

Section 9 Acquired deficiencies of colour vision

- 40 Effects of retinal detachment on S and M cone function in an animal model *page 381*
Gerald H. Jacobs, Jack B. Calderone, Tsutomu Sakai,
Geoffrey P. Lewis, and Steven K. Fisher
- 41 Colour vision in central serous chorioretinopathy *page 389*
Maija Mäntyjärvi and Tarja Maaranen
- 42 Early vision loss in diabetic patients assessed by the Cambridge Colour Test *page 395*
D. F. Ventura, M. F. Costa, M. Gualtieri, M. Nishi, M. Bernick,
D. Bonci, and J. M. de Souza
- 43 Colour-vision disturbances in patients with arterial hypertension *page 404*
Anke Schröder, Carl Erb, Stefan Falk, Gabriele Schwartze,
Jörg Radermacher, and Rolf Winter
- 44 Visual dysfunction following mercury exposure by breathing mercury vapour or by eating mercury-contaminated food *page 409*
Luiz Carlos L. Silveira, Enira Terezinha B. Damin,
Maria da Conceição N. Pinheiro, Anderson R. Rodrigues,
Ana Laura A. Moura, Maria Izabel T. Côrtes, and Guilherme A. Mello

Index *page 419*
